STONE BUSINESS CONSULTANCY- PACKAGE INFO SHEET

Cybersecurity, IT & AI Support Package Info Sheet

Overview- Our Cybersecurity, IT & AI Support Package helps businesses strengthen their digital systems, improve operational efficiency, and confidently adapt to the evolving technology landscape. We provide practical support to identify cybersecurity risks, improve technology systems, streamline communication and workflows, and explore how Artificial Intelligence (AI) and automation can support day-to-day business operations.
From cybersecurity planning and domain management to remote IT support and AI implementation strategies, this package is designed to provide businesses with reliable, practical technology support without the need for an in-house IT department.

Who this package is for-

- Sole traders and small businesses needing reliable IT support
- Businesses wanting stronger cybersecurity systems and processes
- Businesses looking to improve operational efficiency through technology
- Business owners overwhelmed by domains, emails, systems, and digital setup
- Organisations wanting practical AI and automation strategies
- Businesses needing ongoing technology management and support

What's Included-

- Initial 50 minute Cybersecurity, IT & AI advisory session
- Review of current cybersecurity systems and digital risks
- Tailored cybersecurity checklist and implementation recommendations
- Monthly one-on-one 50 minute support and strategy session
- DNS and domain name setup and management assistance
- Professional email setup and configuration support
- Remote ongoing computer support and management
- Workflow and communication system improvement strategies
- AI and automation review for business operations and efficiencies
- Guidance on practical AI tools and implementation opportunities
- Email/phone support between sessions as agreed to by the client

Monthly Structure- Each month includes a tailored 50-minute support and strategy session focused on improving your business technology systems, cybersecurity processes, operational efficiency, and digital workflows. Over the course of the program, we work with you to strengthen cybersecurity protections, streamline communication and workflow systems, implement practical AI and automation opportunities, and develop reliable technology processes that support long-term business growth and operational efficiency.

Key Outcomes-

- Improved cybersecurity awareness and protection
- Stronger and more reliable business technology systems
- Better organisation of communication and workflow systems
- Reduced operational inefficiencies and manual workload
- Practical understanding of AI and automation opportunities
- Increased confidence using technology to support business growth

Why this Package works- Technology should support your business, not overwhelm it. This package combines practical IT support, cybersecurity guidance, and modern AI and automation strategies to help businesses improve efficiency, reduce risk, and stay competitive in an increasingly digital environment. We provide flexible, tailored support designed around the needs, systems, and goals of your business.

Investment- Pricing is provided following an initial consultation, as Stone Business Consultancy may also work with trusted referral partners to ensure clients are matched with the most suitable support depending on their specific needs, systems, and technology requirements.
